

## Pure IP Microwave Radio SDH/PDH - STM-1, STM-4

- \* . Licensed pure IP microwave radio band operation - 6 to 40 GHz
- \* . Split architecture ODU + IDU
- \* . Up to QAM128 Modulation
- \* . ETSI (28 MHz) and FCC (30 MHz) channelization
- \* . Up to 23 dBm of output power
- \* . Ranges in Indonesia : up to 25 miles, region + antenna dependent
- \* . pure IP microwave radio 160 Mbps FDD net throughput (320 Mbps aggregate)
- \* . 1+1 Link Protection can be provided by [gudangwireless.com](http://gudangwireless.com)
- \* . Pure TDM/TM 16T1/E1 TDM ports
- \* . native transport - no TDM over IP
- \* . Real-time user allocation of TDM and IP allocation
- \* . VLAN support and rate limiting
- \* . Telnet, Web, SNMP management
- \* . Flexible user programmability
- \* . FEC, modulation, channel size, TDM parameter

In Indonesia Pure IP Microwave Radio Price \$7,500 - \$15,000, The price depends on the required solution. For example the price for example the price of Pure IP Microwave Radio in Indonesia for redundant system is more expensive compare to the one not redundant.

The price also depends on the accessories and features.
